Resolution:			
Subject:	Bulk edit (multi-record data fix up)		
Description:	<p>Some times the SFM data is non compliant in an 'obvious' way across many records. Provide some tools that can transform the data across the entire (or filtered?) data set.</p> <p>Some examples:</p> <ul style="list-style-type: none">* Find and Replace.* Reorder siblings to conform to the schema's order. Do not move nodes to different parents.* Merge sibling fields (parameter: separator string). This only works for simple fields, not complex objects.* Split simple field into multiple fields (parameter: separator string)
